Alkacon OpenCms overview

Alkacon

- OpenCms is a Website Content Management System
- First public release in March 2000
- Version 5.0 (stable) released May 2003
- Version 6.0 (stable) released June 2005
- Current Version 6.2 released March 2006
- OpenCms is true Open Source Software
- OpenCms is available under the LGPL license
- No licensing costs
- OpenCms can be freely downloaded from the project's website: <http://www.opencms.org>

Alkacon OpenCms overview (2)

Alkacon

- Especially suited to build company websites and intranets
- Build for the needs of medium-large enterprises with existing IT infrastructure
- Most features developed according to “real world” customer requirements
- Highly flexible and customizable
- Written in 100% Java
- Uses many proven components from the open source Java community

Alkacon OpenCms overview (3)

Alkacon

- Open source development effort for core system lead by Alkacon Software GmbH
- Active development community
 - 1000+ mailing list subscribers
- Widespread commercial support
 - About 100 official “Solution Providers”
 - 200+ web companies offer support
- Fair amount of documentation available
 - Book on OpenCms written/edited by community members, revised edition under way
 - Interactive documentation / examples

Alkacon OpenCms overview (4)

Alkacon

- Soft & Hardware requirements
 - Software: Open Source to „High End“
 - e.g. Linux + Tomcat + MySQL
 - e.g. Win NT + IIS + Tomcat + MS SQL
 - e.g. Solaris + BEA + Oracle
 - Hardware: High flexibility
 - Runs on a notebook computer
 - Standard configuration:
Normal Intel PC, 2Ghz CPU, 1 GB Ram
 - Other: SUN Sparc, cluster configuration possible
- Installation is wizard based for default components (e.g. Tomcat, MySQL / Oracle), takes just 5 minutes

OpenCms 6.0 main features

Alkacon

- Direct Edit of content from the front end of the website
- Automatic Online / Offline workflow
- Flexible content repository
- Integrated full text search engine
- WYSIWYG Editor for “unstructured” content
- Easy definition of XML based content items for “structured content”

OpenCms 6.2 improvements

Alkacon

- Multiple selections and operations in the Workplace Explorer
- Native image scaling and manipulation, Photo album
- Visual comparison of document versions
- Integration of the popular FCKeditor for WYSIWYG editing
- Extended editor for structured contents
- Improved search index administration

OpenCms 6 more features

Alkacon

- Manage multiple sites in one installation
- Full text search also in PDF, Word, Excel documents in repository
- Configurable meta information (properties) for all repository resources
- Time based automatic content release / expiration
- Full support for Unicode content
- ACL permission system
- Optional static export of HTML
- JSP based template mechanism
- Templates are version controlled

OpenCms 6 other features

Alkacon

- Advanced multi language support
- Web browser based application
- Full control over the output layout
- Integrated user management
- Project based workflow
- All XML content is schema validated
- Task management
- Version control of content
- History of changes
- XML based content import / export
- Multi path resource access through siblings
- Dynamic page rendering
- Link checking
- Combination of static and dynamic content
- Fully database driven
- Non-GUI shell access to document repository
- Powerful log file configuration
- Open module API for extensions
- ...

Alkacon

Welcome to the OpenCms 6.0 "templateone" demo

This page (and all other pages using this layout) are made using the "templateone" template. This is a full featured OpenCms 6.0 template with additional functions like full text search and automatic navigation building. This template is intended to demonstrate the OpenCms 6.0 capabilities as well as serve as an extended example base to create own template variations.

Please note: This template has been developed in a "real life" project. It should provide a usable "out-of-the-box" template in case you do not want to invest time to create an individual OpenCms template yourself. But this template is not suitable for beginners to learn basic OpenCms template development, it has a complex structure due to the advanced functions. To learn how to develop simple JSP templates from scratch, you should have a look at the "Welcome / Release notes template".

Feedback to the functionality of this template is most welcome.

Demo Screenshot 3: Direct Editing of Contents

Alkacon

The screenshot shows a Microsoft Internet Explorer browser window displaying the OpenCms XML content demo page. The browser's address bar shows the URL: `http://localhost:8080/opencms-dev/opencms/xmlcontentdemo/list.jsp#`. The page features a navigation menu with links for HOME, TEMPLATEONE DEMO PAGES, MODULES DEMO PAGES, XML CONTENT DEMO, and RELEASE NOTES. A search bar is located in the top right corner. The main content area is titled "Simple XML content demo page" and contains a list of sample articles. Each article is displayed with a yellow background and includes a "read more..." link. The page also features a sidebar with a "List demo" section and a "XML content Highlights" section. The browser's status bar at the bottom indicates "Lokales Intranet".

Simple XML content demo page

This is a simple JSP page that shows how to use the new **XML content** feature of OpenCms 6.0. The list below is dynamically generated from XML content objects maintained in the OpenCms VFS. This text here can also be edited in the WYSIWYG editor.

Sample article 1

This is the teaser or the first sample article.
By Alkacon Software GmbH [read more...](#)

This is the article 2 sample

This is the sample article number 2. This is just a demo teaser.
By Alkacon Software GmbH [read more...](#)

Above you see a list dynamically generated using xmlcontent objects.

Please note: A powerful option of OpenCms 6.0 is to create such a list as a page element, and include this element in your template. Click [here](#) to see such a page in action.

XML content Highlights

Among the many uses for the OpenCms 6.0 XML content are:

Automatic editor generation with multiple widgets. Check out the [Widget Demo](#) to see all available widgets in action.

It's possible to "nest" OpenCms XML content, i.e. one XML content definition can include another. See the [Nested XML Content](#) example.

Demo Screenshot 6: Full text search results

Alkacon

The screenshot shows a Microsoft Internet Explorer browser window displaying the search results for 'opencms+xml' on the OpenCms website. The browser's address bar shows the URL: http://localhost:8080/opencms-dev/opencms/system/modules/org.opencms.frontend.templateone/pages/search.html. The page features a navigation menu at the top with links for 'START PAGE', 'ALKACON SOFTWARE GMBH', 'OPENCMS.ORG', 'REFERENCE SITES', and 'SOLUTION PROVIDERS'. The main content area is titled 'Search in area OpenCms Xml Content Demo' and contains a search bar with the query 'opencms+xml'. Below the search bar, there are three search results, each with a percentage of relevance and a brief description of the content. The first result is 'New features of this release (100%)', the second is 'Page using a sample side element (60%)', and the third is 'Contents for detail view (48%)'. A sidebar on the left lists various demo pages, and a sidebar on the right provides 'XML content Highlights'.

Reasons for using OpenCms

Alkacon

- Proven
 - Used by organizations/companies large and small all around the world
- Mature
 - In open source development since 2000
 - Current Version is 6.2
- Easy to use
 - Both WYSIWYG and structured editing, contents directly editable through the frontend
- Standards compliant
 - Uses / implements mature API standards
- Support is available
 - Currently about 100 companies worldwide have registered as official *OpenCms Solution Provider*

Reasons for using OpenCms

Alkacon

- Cost saving potential
 - Compared to pricy licensing models of traditional closed source vendor products
- Open Source
 - Vendor independence especially important since “consolidation” of CMS market continues
- Fits well into existing IT infrastructure
 - Platform neutral because of Java
 - Can usually use your existing DB (e.g. Oracle)
- Good base for “make” decision
 - In case of “make or buy”
- Favorably reviewed by Analysts
 - E.g. Gartner Group recognizes OpenCms as “one of the most complete and mature of the [Open Source CMS] products reviewed” (*)

(*) Source: Gartner Group report “Roundup of Open-Source Content Management Systems, 1H04” (April 2004)
