</cms:
<%
}%>
```

Some Statistics....

OpenCms is used by 0.1% of all the websites whose content management system were known by w3techs.

What can I do??

- I needed to be more competitive...
- The goal: lower prices to compete but generating benefits and not giving up the product's quality.

How?

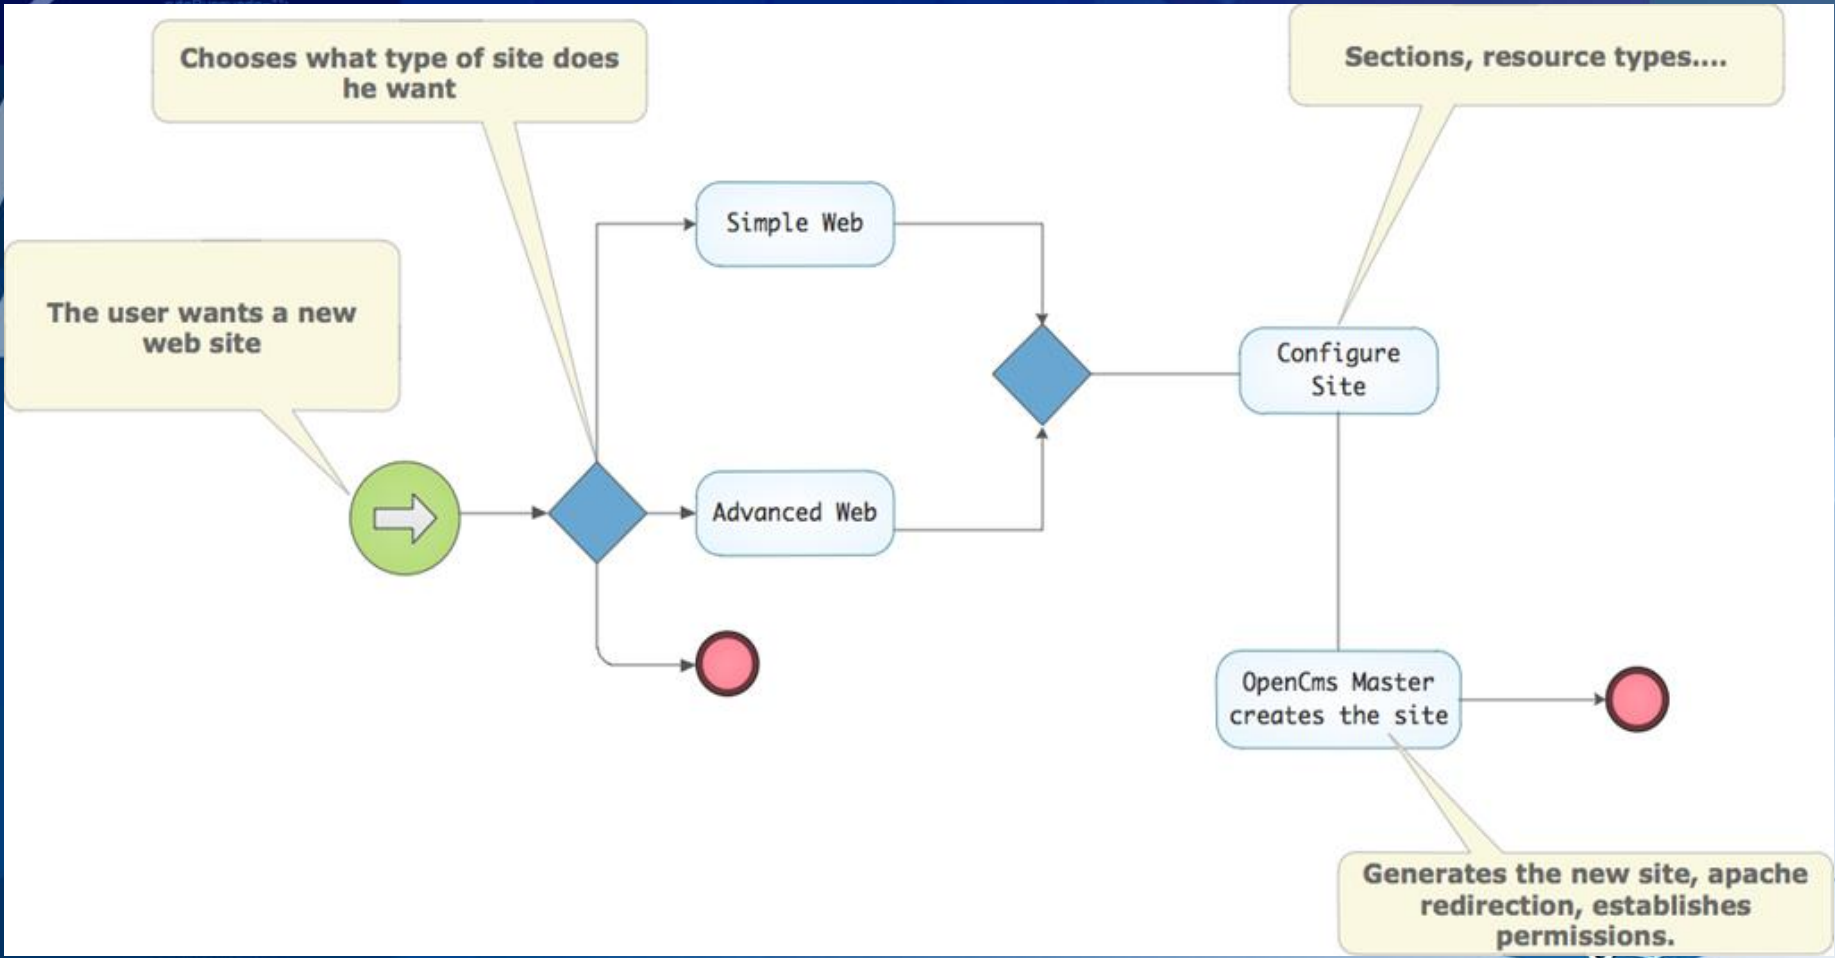

- Changing programming language and cms?
- Need a way to do reusable templates, reusable components etc... to reduce my costs and hence reduce my client's costs.

```
<%@ page import="java.util.*,org.opencms.jsp.*, org.opencms.file.*" %>
<%@ taglib prefix="cms" uri="http://www.opencms.org/taglib/cms" %>
<%@ taglib prefix="fmt" uri="http://java.sun.com/jsp/jstl/fmt" %>
<%@ taglib prefix="c" uri="http://java.sun.com/jsp/jstl/core" %>
```

```
<%
// recogemos el parametro y lo metemos en el contexto para el contentload
//pageContext.setAttribute("rutaBusqueda", request.getParameter("rutaBusqueda"));

ActionElement cms = new CmsJspActionElement(pageContext, request, response);
String rutaBusqueda=(String)pageContext.getAttribute("rutaBusqueda",
pageContext.REQUEST_SCOPE);
if(rutaBusqueda==null)
//rutaBusqueda="";
//pageContext.setAttribute("rutaBusqueda", rutaBusqueda);
```

The Idea

```
<%
}
%>
```

```
<%@ page import="java.util.*, org.opencms.jsp.*, org.opencms.file.*" %>
<%@ taglib prefix="cms" uri="http://www.opencms.org/taglib/cms" %>
<%@ taglib prefix="fmt" uri="http://java.sun.com/jsp/jstl/fmt" %>
<%@ taglib prefix="c" uri="http://java.sun.com/jsp/jstl/core" %>
```

```
<%
// recogemos el parametro y lo metemos en el contexto para el contentload
//pageContext.setAttribute("rutaBusqueda", request.getParameter("rutaBusqueda"));
ActionElement cms = new cms.jsp.ActionElementOpenCmsContext(request, response);
```

The Infrastructure

```
<%@ page import="java.util.*, org.opencms.jsp.*, org.opencms.file.*" %>
<%@ taglib prefix="cms" uri="http://www.opencms.org/taglib/cms" %>
<%@ taglib prefix="fmt" uri="http://java.sun.com/jsp/jstl/fmt" %>
<%@ taglib prefix="c" uri="http://java.sun.com/jsp/jstl/core" %>
```

```
<%
// recogemos el parametro y lo metemos en el contexto para el contentload
//pageContext.setAttribute("rutaBusqueda", request.getParameter("rutaBusqueda"));
```

```
ActionElement cms = new CmsJspActionElement(pageContext, request, response);
String rutaBusqueda=(String)pageContext.getAttribute("rutaBusqueda");
pageContext.REQUEST_SCOPE);
if(rutaBusqueda==null)
rutaBusqueda="";
```

Core Modules

- Site generator:
 - Creates the site with the structure.
 - Associates the resources the user can use.
 - Establishes the permissions.
 - Updates the sites in OpenCms (without restart).
- Apache Redirection:
 - Enables the client to redirect their domain

```
<%@ page import="java.util.*,org.opencms.jsp.*, org.opencms.file.*" %>
<%@ taglib prefix="cms" uri="http://www.opencms.org/taglib/cms" %>
<%@ taglib prefix="fmt" uri="http://java.sun.com/jsp/jstl/fmt" %>
<%@ taglib prefix="c" uri="http://java.sun.com/jsp/jstl/core" %>
```

```
<%
// recogemos el parametro y lo metemos en el contexto para el contentload
//pageContext.setAttribute("rutaBusqueda", request.getParameter("rutaBusqueda"));
```

Core Modules

OpenCmsWS:

WebServices that will be used by the OpenCmsMaster to control the other instances

OpenCmsMaster:

There will be a master OpenCms which will decide where the new sites will be created.

OpenCmsStatistics:

Will have statics of usage.

```
<c:set var="dateString"><cms:contentshow element="StartDate"/></c:set><%
java.util.Date date = new java.util.Date();
//date.setTimeZone(new java.util.TimeZone("GMT-5"));
pageContext.setAttribute("date", date);
}catch(Exception e){
pageContext.setAttribute("date","");
}
</c:if>
<div class="lobscv">
<div class="<:ms:link><:ms:contentshow element="%(opencms.fileName)
/></cms:link>?i=<% out.print(request.getParameter("i")); %>">
<cms:contentshow element="Candidate" />
</div>
<div class="<:ms:link><:ms:contentshow element="Role" /></div>
</c:if>
<div class="separatorResourceLine" />
</div>
</c:if>
</cms:contentload>
<%>
```

```
<%@ page import="java.util.*,org.opencms.jsp.*, org.opencms.file.*" %>
<%@ taglib prefix="cms" uri="http://www.opencms.org/taglib/cms" %>
<%@ taglib prefix="fmt" uri="http://java.sun.com/jsp/jstl/fmt" %>
<%@ taglib prefix="c" uri="http://java.sun.com/jsp/jstl/core" %>
```

```
<%
// recogemos el parametro y lo metemos en el contexto para el contentload
//pageContext.setAttribute("rutaBusqueda", request.getParameter("rutaBusqueda"));
```

```
ActionElement cms = new CmsJspActionElement(pageContext, request, response);
String rutaBusqueda=(String)pageContext.getAttribute("rutaBusqueda",
pageContext.REQUEST_SCOPE);
if(rutaBusqueda==null)
rutaBusqueda="";
```

Core Modules

- **OpencmsResourceCreator:**
 - Creates resources in a user friendly way.
- **OpenCmsContentEdit:**
 - Creates resources in a user friendly way.
- **OpenCmsCloud:**
 - This module will determine if the OpenCms work load is reaching it's maximum and will start up another server with another OpenCms' instance.

```
<%@ page import="java.util.*, org.opencms.jsp.*, org.opencms.file.*" %>
<%@ taglib prefix="cms" uri="http://www.opencms.org/taglib/cms" %>
<%@ taglib prefix="fmt" uri="http://java.sun.com/jsp/jstl/fmt" %>
<%@ taglib prefix="c" uri="http://java.sun.com/jsp/jstl/core" %>
```

```
<%
// recogemos el parametro y lo metemos en el contexto para el contentload
//pageContext.setAttribute("rutaBusqueda", request.getParameter("rutaBusqueda"));
ActionElement cms = new CmsJspActionElement(pageContext, request, response);
String rutaBusqueda=(String)pageContext.getAttribute("rutaBusqueda",
pageContext.REQUEST_SCOPE);
if(rutaBusqueda==null)
rutaBusqueda="";
%>
```

Add-on Modules

- OpenCmsTraductor:
 - Translates OpenCms content
- OpenCmsWeather:
 - Weather forecast.
- OpenCmsSocialMedia:
 - Connect to social media.
- OpenCmsMobile:
 - Adapt web to mobile devices (Merkur).

```
<%@ page import="java.util.*,org.opencms.jsp.*, org.opencms.file.*" %>
<%@ taglib prefix="cms" uri="http://www.opencms.org/taglib/cms" %>
<%@ taglib prefix="fmt" uri="http://java.sun.com/jsp/jstl/fmt" %>
<%@ taglib prefix="c" uri="http://java.sun.com/jsp/jstl/core" %>
```

```
<%
// recogemos el parametro y lo metemos en el contexto para el contentload
//pageContext.setAttribute("rutaBusqueda", request.getParameter("rutaBusqueda"));
ActionElement cms = new CmsJspActionElement(pageContext, request, response);
String rutaBusqueda=(String)pageContext.getAttribute("rutaBusqueda",
pageContext.REQUEST_SCOPE);
if(rutaBusqueda==null)
rutaBusqueda="";
```

Add-on Modules

OpenCmsAdds:

- Helps the user to put google addwords to their site
- Propagates news/adds on all the sites that allow it.

OpenCmsReports:

- Exports content to pdf, word....

OpenCmsTagCloud:

- Tag cloud for blogs

```
</cms:contentload>
<%
}
%>
```

```
<%@ page import="java.util.*,org.opencms.jsp.*, org.opencms.file.*" %>
<%@ taglib prefix="cms" uri="http://www.opencms.org/taglib/cms" %>
<%@ taglib prefix="fmt" uri="http://java.sun.com/jsp/jstl/fmt" %>
<%@ taglib prefix="c" uri="http://java.sun.com/jsp/jstl/core" %>
```

```
<%
// recogemos el parametro y lo metemos en el contexto para el contentload
//pageContext.setAttribute("rutaBusqueda", request.getParameter("rutaBusqueda"));
```

```
    ActionElement cms = new CmsJspActionElement(pageContext, request, response);
    String rutaBusqueda=(String)pageContext.getAttribute("rutaBusqueda",
    pageContext.REQUEST_SCOPE);
    if(rutaBusqueda==null)
    rutaBusqueda="";
```

Add-on Modules

- OpenCmsBlog
- OpenCms blog based
- And many, many more to come....

```
<%>
```
